

PERSONAL TRAINING CLIENT PACKET

Dear Participant:

Thank you for your interest in the West River Community Center Personal Training Program. It is our mission to provide you with first class instruction and personal training designed to achieve your personal fitness goals.

This packet includes information on your health history, your exercise history and goals and expected trainer/client conduct. It should be completed entirely and brought with you to your initial consultation. The information in this packet will help your personal trainer to develop a program specifically tailored for you; therefore, it is important to answer all questions thoroughly and honestly. All information will be kept confidential and will be discussed further with your trainer at your first meeting.

Forms to be completed before your first meeting with your personal trainer:

- Completion of PAR-Q (1 page) and Health History Form (3 pages)
- Medical Release Form (if necessary)
 - The Medical Release Form is required if you answer “yes” to any question on the PAR-Q and may be required if your trainer determines you are at a higher risk based on information provided on your Health History Form.
 - Attainment of medical release will be organized by your trainer and discussed at your initial meeting.
- Completion of Exercise History and Goals Worksheet (2 pages)
- Reading and signing the Personal Trainer and Client Code of Conduct
- Completion of Assumption of Risk Agreement

If you have any questions or concerns, please contact Matt Mack at (701) 456-2074.

Thank you,

PAR-Q

(A Questionnaire for People Aged 15 to 69)

Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. Being more active is very safe for most people. However, some people should check with their doctor before they start becoming much more physically active.

If you are planning to become much more physically active than you are now, start by answering the seven questions in the box below. If you are between the ages of 15 and 69, the PAR-Q will tell you if you should check with your doctor before you start. If you are over 69 years of age, and you are not used to being very active, check with your doctor.

Common sense is your best guide when you answer these questions. Please read the questions carefully and answer each one honestly: check YES or NO.

YES	NO	
<input type="checkbox"/>	<input type="checkbox"/>	1. Has your doctor ever said that you have a heart condition <u>and</u> that you should only do physical activity recommended by a doctor?
<input type="checkbox"/>	<input type="checkbox"/>	2. Do you feel pain in your chest when you do physical activity?
<input type="checkbox"/>	<input type="checkbox"/>	3. In the past month, have you had chest pain when you were not doing physical activity?
<input type="checkbox"/>	<input type="checkbox"/>	4. Do you lose your balance because of dizziness or do you ever lose consciousness?
<input type="checkbox"/>	<input type="checkbox"/>	5. Do you have a bone or joint problem (for example, back, knee or hip) that could be made worse by a change in your physical activity?
<input type="checkbox"/>	<input type="checkbox"/>	6. Is your doctor currently prescribing drugs (for example, water pills) for your blood pressure or heart condition?
<input type="checkbox"/>	<input type="checkbox"/>	7. Do you know of <u>any other reason</u> why you should not do physical activity?

If
you
answered

YES to one or more questions, please read and initial in box

Talk with your doctor by phone or in person BEFORE you start becoming much more physically active or BEFORE you have a fitness appraisal. Tell your doctor about the PAR-Q and which questions you answered YES.

- You may be able to do any activity you want — as long as you start slowly and build up gradually. Or, you may need to restrict your activities to those which are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice.
- Find out which community programs are safe and helpful for you.

Initial (if YES to any question) _____

NO to all questions

If you answered NO honestly to all PAR-Q questions, you can be reasonably sure that you can:

- start becoming much more physically active — begin slowly and build up gradually. This is the safest and easiest way to go.
- take part in a fitness appraisal — this is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively. It is also highly recommended that you have your blood pressure evaluated. If your reading is over 144/94, talk with your doctor before you start becoming much more physically active.

DELAY BECOMING MUCH MORE ACTIVE:

- if you are not feeling well because of a temporary illness such as a cold or a fever — wait until you feel better; or
- if you are or may be pregnant — talk to your doctor before you start becoming more active.

PLEASE NOTE: If your health changes so that you then answer YES to any of the above questions, tell your fitness or health professional. Ask whether you should change your physical activity plan.

Informed Use of the PAR-Q: The West River Community Center, Dickinson Parks and Recreation and their agents assume no liability for persons who undertake to undertake completing this questionnaire, consult your doctor prior to physical activity.

"I have read, understood and completed this questionnaire. Any questions I had were answered to my full satisfaction."

Note: This physical activity clearance is valid for a maximum of 12 months from the date it is completed and becomes invalid if your condition changes so that you would answer YES to any of the seven questions.

PERSONAL TRAINING CLIENT PACKET

Medical Release Form

- If you answered “yes” to any of the questions on the PAR-Q form, it is required that you have a medical release completed by your physician before a trainer begins any fitness regimen with you.
- Your trainer may also require that a Medical Release Form be completed before beginning any fitness regimen with you if your health history indicates any higher risk conditions. If necessary, this will be discussed in greater detail during your initial consultation.
