

2021 Tanning Patron Information and Consent Form

Name: _____ Phone: _____

Address: _____ Date of Birth: ___/___/___ Age: _____

City: _____ State: _____ Zip: _____

Failure to wear protective eyewear may result in:

- Severe damage and long term injury to the eyes; including cataracts.
- Closing the eyes or covering face with towel is not sufficient to prevent possible eye damage.

Potential negative health effects:

- Overexposure to ultraviolet radiation(tanning devices) causes burns;
- Repeated exposure to a tanning device may cause premature aging of the skin and may cause skin cancer.

Abnormal skin sensitivity or burning of the skin while using a tanning device may be caused by:

- Certain foods;
- Certain cosmetics;
- Certain medications, including tranquilizers, diuretics, antibiotics, high blood pressure medicines, and birth control pills.

An individual who takes a drug should consult a physician before using a tanning device.

Anyone under the age of 14 must have a written order from a physician and must be accompanied by a parent or legal guardian to use a tanning device. Consult a physician before tanning if you are pregnant, using medications or are especially sensitive to sunlight.

I/we understand that my/our participation in this activity requires that I/we be responsible for our own health and safety. It should be noted that it is my/our responsibility to obtain a physical examination prior to starting any program if I/we choose and that Dickinson Parks and Recreation is not responsible for injuries. I/we also agree that I/we will wear food and drug administration approved protective eyewear.

WARNING!!!

DANGER - ULTRAVIOLET RADIATION

Avoid too frequent or too lengthy exposure. Like exposure to the sun, use of a tanning device can cause eye and skin injury and allergic reactions. Repeated exposure can cause chronic sun damage, which is characterized by wrinkling, dryness, fragility and bruising of the skin, and skin cancer.

WEAR FOOD AND DRUG ADMINISTRATION-APPROVED PROTECTIVE EYEWEAR. FAILURE TO WEAR PROTECTIVE EYEWEAR MAY RESULT IN SEVERE BURNS OR LONG-TERM INJURY TO THE EYES.

Ultraviolet radiation from tanning devices will aggravate the effects of the sun, so do not sunbathe during the twenty-four hours immediately preceding or immediately following the use of a tanning device.

Medications and cosmetics may increase your sensitivity to ultraviolet radiation. Consult a physician before using a tanning device if you are using medications, have a history of skin problems, or believe that you are especially sensitive to sunlight. Women who are pregnant or using birth control pills and who use a tanning device may develop discolored skin.

If your skin does not tan when exposed to sun, it is unlikely that your skin will tan when exposed to this tanning device.

I/we have read and understand the above warnings concerning using a tanning device and that I/we are responsible for our own health and safety.
